

415
(Amended) 21. The revenue meter according to claim 1, further comprising:
terminals disposed on a bottom side of the revenue meter for coupling the
revenue meter with the electric circuit;
a terminal cover for covering said terminals; and
a first seal connected with said meter cover and operative to prevent
removal of said meter cover.

(Amended) 22. The revenue meter according to claim 1, further comprising:
a draw-out chassis coupled with the revenue meter and operative to fit
within a switchboard enclosure;
terminals disposed on said chassis for engaging matching terminals within
said enclosure; and
a seal connected with said meter cover and operative to prevent removal
of said meter cover and indicate tampering with the revenue meter.

Please add new claims 23-31 as follows:

416
Sub 2
(New) 23. A revenue meter for measuring the delivery of electrical energy
from an energy supplier to a consumer through an electric circuit, the revenue meter
comprising:

a graphic user interface connected with the revenue meter, said graphic
user interface operative to display graphical objects;

a meter cover operative to enclose the revenue meter and said graphic
user interface;

a keypad located on said meter cover and connected with the revenue
meter, said keypad being operative to interact with said graphic user interface without
removing said meter cover.

(New) 24. The revenue meter according to claim 23, wherein said keypad
further includes a web portion which allows a plunger of said keypad to move in a
direction generally perpendicular to said keypad.

16
(New) 25. The revenue meter according to claim 23, further including intermediate actuators to mechanically connect said keypad with said graphic user interface of the revenue meter.

(New) 26. The revenue meter according to claim 24 wherein the keypad is elastic.

(New) 27. The revenue meter according to claim 25, further including a compression plate, said compression plate including a locating portion operative to align said keypad to said intermediate actuators.

(New) 28. The revenue meter according to claim 23, further including a compression plate operative to compress said keypad to said meter cover and further operative to provide a water tight seal.

(New) 29. The revenue meter according to claim 23, further comprising:
bayonet terminals disposed on the revenue meter mateable with matching jaws of a detachable meter mounting device; and
a seal connected between the revenue meter and said detachable meter mounting device, said seal operative to prevent removal of the revenue meter and indicate tampering with the revenue meter.

(New) 30. The revenue meter according to claim 23, further comprising:
terminals disposed on a bottom side of the revenue meter for coupling the revenue meter with the electric circuit;
a terminal cover for covering said terminals; and
a first seal connected with said meter cover and operative to prevent removal of said meter cover.

(New) 31. The revenue meter according to claim 23, further comprising:
a draw-out chassis coupled with the revenue meter and operative to fit within a switchboard enclosure;
terminals disposed on said chassis for engaging matching terminals within said enclosure; and
